PROFILE SUMMARY

Electronics and Communication Engineering student with a strong interest in bridging software and hardware systems. Hands-on experience building projects that combine machine learning, embedded systems, and full-stack development. Seeking opportunities to apply and expand technical skills in an industry environment. Along with some extracurricular skills.

EDUCATION

B.Tech, Electronics & Communication Engineering — VIT-AP University, Amaravati, Andhra Pradesh (8.61 CGPA) (2029)

Higher Secondary (12th), Krishna Public School, Dunda, Raipur, Chhattisgarh (2024)

Secondary (10th), Krishna Public School, Dunda, Raipur, Chhattisgarh (2022)

SKILLS

Software: Python, Java, Embedded C, C++, HTML, CSS

Hardware: Verilog, PCB Design, Microcontrollers (ESP32, Arduino), Sensors, ARM Cortex M3 (32 bit LPC1768)

Tools: MATLAB, KiCad, Vivado (FPGA), Multisim, git/github, Keil µVision 4/5

ExtraCurricular: Video Editing — DaVinci Resolve 20 (Beginner), UI/UX Design — Figma (Beginner)

SoftSkills: Communication, Leadership, Project Management

EXPERIENCE / WORK HISTORY

- Member, IETE Club — managed the technical operations for the "Stranger Things" event at VTAPP fest (July, 2026 – PRESENT)

PROJECTS

Project Drishti — Predictive Intelligence for Aadhaar ([Github](#))

- Built an analytics framework to strengthen the Aadhaar enrollment ecosystem by combining unsupervised machine learning, forensic statistical auditing, and live geospatial APIs.
- Transformed static enrollment records into actionable, field-level intelligence for identifying anomalies.

SyncForge (EduFlow) ([Website](#))

- Developed an award-winning academic entrepreneurship project using a RAG + LLM + sentence-transformer architecture to analyze students' CAT answer sheets via OCR.
- Generated detailed, question-level performance reports highlighting individual weak points.
- Designed a personalized virtual interview module using the GPT API and Whisper to evaluate spoken responses, producing a final skill-graph report for each student.

ADAS Autonomous Rover ([Github](#))

- This project is a miniature Advanced Driver Assistance System (ADAS) demonstrating a distributed processing architecture. Heavy computational tasks (Computer Vision, Machine Learning).

ACHIEVEMENTS & CERTIFICATES ([Certificate-Drive](#))

Ideathon : Winner of ideathon challenge conducted in VIT AP University by IEI-CSE club and won the Rs 1000 cash prize where we have pitched the idea of modern adaptive curriculum AI model "EDUFLOW".

Hedera Hashgraph : Successfully completed Hedera Blockchain programme and gained HCF and HCDA.
